Northern Alliance

Raising Attainment in Literacy, Language and Communication **2017/2018 – Interim Report: November 2017**

This report summarises the progress made in the *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream as of November 2017.

Interim Report Summary – Key Points:

- The *Raising Attainment in Literacy, Language and Communication* workstream is providing direct support to practitioners in 47% of primary schools across the Northern Alliance during its second year (2017/2018).

From the data collection of a sample of Primary 1 pupils across the Northern Alliance in September 2017, it would be reasonable to summarise:

- On Primary 1 entry developmental gaps in foundational reading and writing skills are to be expected. These individual differences arise from natural variation in development as well as from environmental factors. The purpose of the emerging literacy approach is to enable teachers easily to adapt teaching and learning to the expected developmental variations.
- On Primary 1 entry the particular pattern of gaps is different for each individual child. At a whole class level, each class will have different patterns, and there will be year-on-year differences in the same school. There are, however, areas of foundational reading and writing skills in which gaps are more and less prominent. It would not be developmentally expected for all children to enter Primary 1 with secure foundational reading and writing skills. Taking a developmental approach to Emerging Literacy therefore supports practitioners to identify said strengths and gaps to match teaching and learning to the needs of each and every child.
 - On Primary 1 entry less than one in ten (7%) of Primary 1 children had fully secure phoneme discrimination, phoneme segmentation and phoneme blending skills, the phonemic awareness skills which underpin reading and spelling words using phonics.
 - On Primary 1 entry less than four in five Primary 1 children (79%) had secure pencil control skills which underpin the writing of letters.

Northern
Alliance

Northern Alliance

Raising Attainment in Literacy, Language and Communication 2017/2018 – Interim Report: November 2017

- On Primary 1 entry there is evidence of developmental gaps linked to deprivation.
 - On Primary 1 entry there was a gap of 1.1 in the average scores (out of a possible 12) for Phonological Awareness between Primary 1 children living in the most deprived areas (SIMD 1-3) [N=4.3] compared with those living in the least deprived areas (SIMD 8-10) [N=5.4].
 - On Primary 1 entry there was a 10% difference in the percentage of Primary 1 children, linked to deprivation, who had a secure tripod grasp, a skill foundational to the manipulation of writing implements. Of the P1 children assessed 78% of those children living in the most deprived (SIMD 1-3) areas and 88% of children living in the least deprived (SIMD 8-10) areas had a secure tripod grasp.

Interim Report Summary – Future Recommendations:

1. As part of the national arrangements for regional collaboration the *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream should detail the action plan moving forward within the Northern Alliance Improvement Plan (due to be published in early 2018).
2. The successful model of collaboration developed within the *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream, and detailed within this report, should be shared with the Lead Officers of the Northern Alliance workstreams.
3. The data published within this report should be used as a basis to monitor ongoing progress and performance across the Northern Alliance. At school level practitioners should continue to use the data to inform learning, teaching and assessment to raise attainment and close the poverty related gap.
4. The *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream has been designed by practitioners for practitioners, with support from a wide range of Allied Health Professionals (AHPs) and other specialists. The collaboration within and between local authorities and health boards should continue to be developed to enable self-evaluation at practitioner level to inform the core support at regional level. AHP services may find it helpful to monitor the impact of participating in the workstream on service delivery against the [Ready to Act](#) framework.
5. The learning from the *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream should continue to be shared at national level to support ongoing improvement for Scotland's children and young people.

Northern
Alliance

Northern Alliance

Raising Attainment in Literacy, Language and Communication

2017/2018 – Interim Report: November 2017

1. Background to 2017/2018 Interim Report – November 2017

The Northern Alliance, the Improvement Collaborative of eight local authorities across the north of Scotland (Aberdeen City, Aberdeenshire, Argyll and Bute, Eilean Siar [Western Isles], Highland, Moray, Orkney Islands and Shetland Islands), has identified 'Raising Attainment in Literacy, Language and Communication' as a key workstream within the Northern Alliance Improvement Plan.

The *Raising Attainment in Literacy, Language and Communication* workstream sets out to:

- provide equality and equity of Career Long Professional Learning (CLPL) across the geographical area of the Northern Alliance as a vehicle to enhance practice
- directly support practitioners to develop their knowledge, understanding and application of research informed pedagogy which is proven to improve outcomes for children and young people
- develop face-to-face and digital collaboration between practitioners, within and across local authorities and health boards, to promote leadership of learning across the Northern Alliance.

As part of the *Raising Attainment in Literacy, Language and Communication* workstream, during the 2016/2017 academic session a pilot group of schools across the Northern Alliance were supported in taking a developmental approach to Emerging Literacy. The positive impact on practice and outcomes for children were detailed in the [**Northern Alliance: Raising Attainment in Literacy, Language and Communication – 2016/2017 Final Report**](#) published on Friday 7th July 2017.

This report (November 2017) follows the final report from the 2016/2017 session, detailing the overview for the 2017/2018 session.

The purpose of this interim report (November 2017) is to:

- ❖ share the support available to local authorities across the Northern Alliance during the 2017/ 2018 session
- ❖ provide an analysis of the P1 pupil data from September 2017 for Phonological Awareness and Pre-Handwriting
- ❖ set out the recommendations for the remainder of the 2017/2018 session and beyond.

Background: Raising Attainment in Literacy, Language and Communication – The National Context

The **National Improvement Framework** has set out the following priorities for Scottish Education:

- to improve attainment for all, particularly in literacy and numeracy
- to improve the learning progress of every child, by reducing inequality in education
- to improve children and young people's health and wellbeing
- to improve employability skills and sustained positive school leaver destinations for all young people.

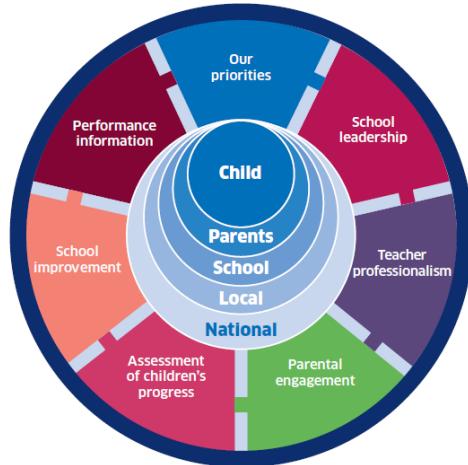

Figure 1.1 - National Improvement Framework: Drivers; Scottish Government (2016)

The *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream strives to raise attainment for all and close the poverty related attainment gap through:

- developing the infrastructure to enable collaborative professional enquiry
- the delivery of quality research informed professional learning for practitioners to inform learning, teaching and assessment
- supporting reflection on the performance of learners to enable continuous improvement.

How good is our school? (fourth edition), Education Scotland's framework for self-improvement in schools, supports self-evaluation through three key questions:

- **Leadership and Management:** How good is our leadership and approach to improvement?
- **Learning Provision:** How good is the quality of care and education we offer?
- **Successes and Achievements:** How good are we at ensuring the best possible outcomes for all our learners?

The *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream aims to drive improvement through the following Quality Indicators (QIs) of HGIOS4:

- Q.I 1.3 – Leadership of change
- Q.I 2.3 – Learning, teaching and assessment
- Q.I 2.5 – Family learning
- Q.I 2.7 – Partnerships
- Q.I 3.2 – Raising attainment and achievement.

Background: Raising Attainment in Literacy, Language and Communication – Support Structure

Figure 1.2 – Northern Alliance: Raising Attainment in Literacy, Language and Communication: Support Structure

To support the improvement planning and implementation of the *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream the following support structure for practitioners is in place:

- ❖ **Regional Improvement Lead** – with an overview of the Regional Improvement Collaborative Improvement Plan, working directly with local authorities and Education Scotland
- ❖ **Quality Improvement Officer** – as the lead officer for the *Raising Attainment in Literacy, Language and Communication* workstream
- ❖ **Education Key Links Group** – to support the improvement agenda within each of the local authorities
- ❖ **Partnership Group** – to support the improvement agenda within and across local authorities and health boards.

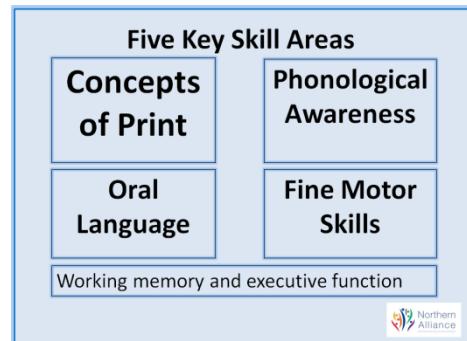

Raising Attainment in Literacy, Language and Communication

2017/2018 – Interim Report: November 2017

Background: Emerging Literacy across the Northern Alliance: The Rationale

Research shows that children's individual differences in key emerging literacy skills are an underlying factor in the variation of attainment across the curriculum. These differences can persist and underlie inequalities that only become apparent much later in schooling. The many skills involved can be classified into five key skill areas: concepts of print, executive function, oral language, phonological awareness and pre-handwriting. **Research** also shows that children make the most progress when teachers ensure that literacy teaching and learning reflects the developmental status of the children that they teach.

To make this practical, teachers need sustainable ways to assess the skill level of pupils, and also a range of approaches to teaching that can support the development of the five key skill areas. Classroom teachers in Highland have been working with Allied Health Professionals (AHPs), including Occupational Therapists and Speech and Language Therapists, as well as other specialists, to provide assessment and teaching materials that can enable teachers to respond to the literacy needs of each learner in their class. These are set out as developmental continua in each of the key skill areas. This approach is now being embedded within the local authorities across the Northern Alliance.

The Process of Taking a Developmental Approach to Emerging Literacy

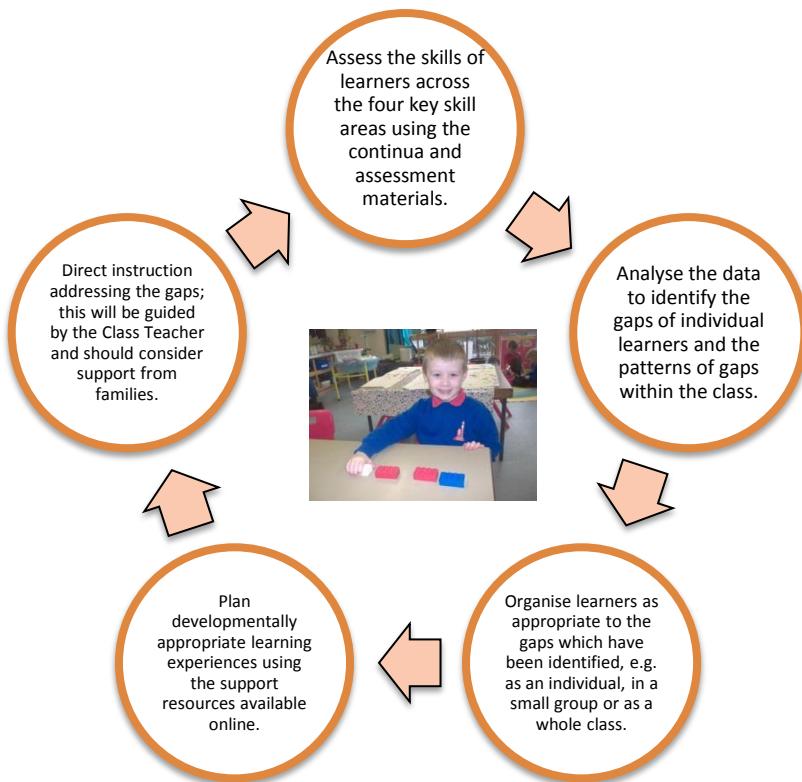

Figure 1.2 – Emerging Literacy across the Northern Alliance: The Cycle of Learning

Northern
Alliance

Northern Alliance

Raising Attainment in Literacy, Language and Communication

2017/2018 – Interim Report: November 2017

2. Emerging Literacy across the Northern Alliance: Implementation

Core Support for Practitioners (2017/2018 Overview)

The *Raising Attainment in Literacy, Language and Communication* workstream strives to improve the outcomes for children and young people, enhancing classroom practice through strengthening collaboration through research informed Career Long Professional Learning (CLPL).

The workstream supports practitioners through collaborative improvement at local authority and regional level using the following core support approaches (**Figure 2.1**):

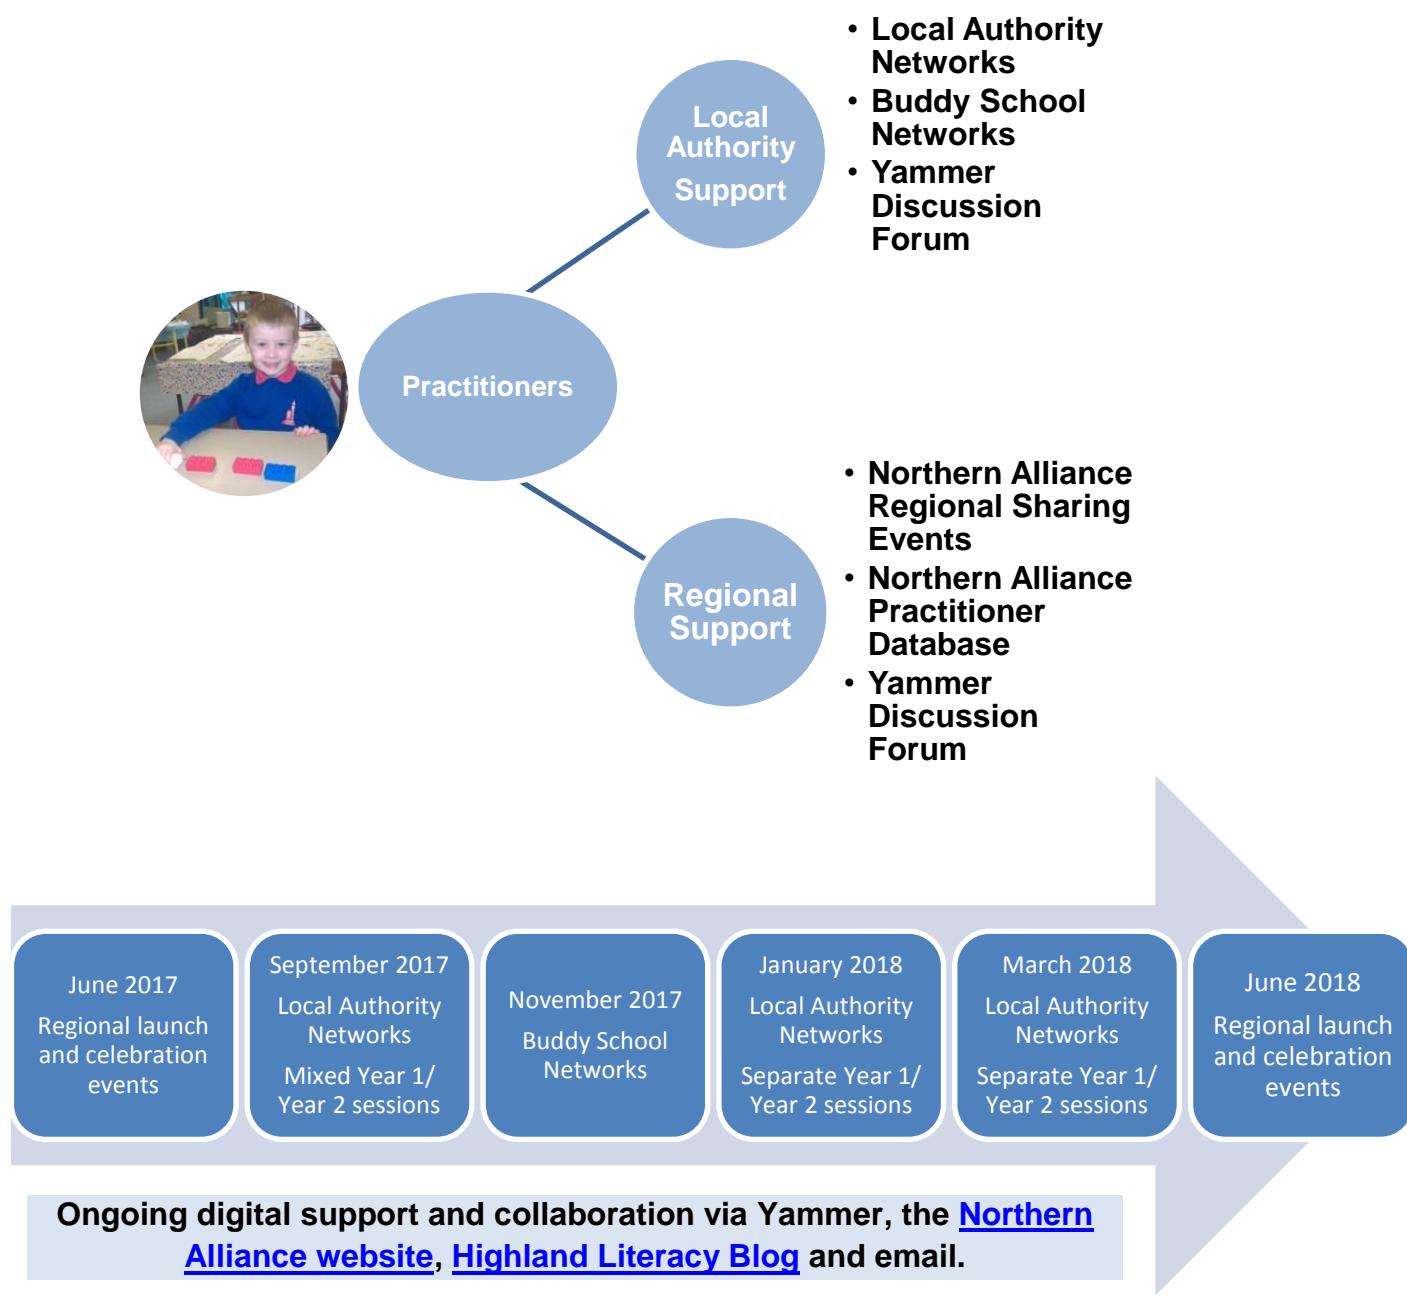

Figure 2.1 – Raising Attainment in Literacy, Language and Communication: Core Support

Each Local Authority has a nominated Education Key Link to support improvement at local authority level, co-ordinated by James Cook (Northern Alliance).

- ❖ Aberdeen City Council – Lydia Tait
- ❖ Aberdeenshire Council – Gaye Stevenson
- ❖ Argyll and Bute – **
- ❖ Eilean Siar (The Western Isles Council) – Mary Clare Ferguson
- ❖ Highland Council – James Cook
- ❖ Moray Council – Corrina Campbell
- ❖ Orkney Islands Council – Amy McCracken/ Carol McManus
- ❖ Shetland Islands Council – Samantha Flaws/ Helen Robertson

*** Argyll and Bute joined the Northern Alliance in October 2017. Argyll and Bute have begun developing support for early literacy, language and communication as part of the Argyll and Bute Improvement Plan. As part of the Northern Alliance Improvement Plan, collaboration between the Regional Improvement Lead the Raising Attainment in Literacy, Language and Communication Lead Officer and key links within Argyll and Bute is currently being developed to enable practitioners across Argyll and Bute to benefit from taking a developmental approach to Emerging Literacy in collaboration with individual school and local authority improvement priorities.*

A breakdown of the engagement information across the Northern Alliance can be found in **Figure 2.2** and full list of schools by local authority in **Appendix 1** of this document. 47% of schools are currently engaging with the workstream across the Northern Alliance. The information includes the number and percentage of schools supported in one of four categories:

- 2016/2017-Core (initial launch schools from 2016/2017)
- 2016/2017-Parallel (parallel 2016/2017 schools supported by local authorities/ health boards)
- 2017/2018-Core (initial launch schools from 2017/2018)
- 2017/2018-Parallel (parallel 2017/2018 schools supported by local authorities/ health boards).

Where parallel schools have been identified within local authorities, the initial launch has been delivered by the Lead Officer. Subsequent support through the Local Authority Networks is being provided by the Local Authority Education Key Link and partners from Allied Health through a train-the-trainer model. This model has enabled local authorities to support all of the schools who wish to benefit from the workstream's provision.

All practitioners have access to and are supported to use the Yammer platform to foster continuous collaboration. **Guidance** was shared with practitioners in October/ November 2017 when the *Raising Attainment in Literacy, Language and Communication* Yammer group was launched.

Northern
Alliance

Northern Alliance

Raising Attainment in Literacy, Language and Communication 2017/2018 – Interim Report: November 2017

The aim of 'Taking a Developmental Approach to Emerging Literacy' is to support practitioners in matching the teaching and learning to the developmental needs of the children that they work with. The *Raising Attainment in Literacy, Language and Communication* workstream, from its beginnings in 2013/ 2014, to its current development in 2017/2018, has and will continue to respond to the needs of practitioners who strive to better the outcomes for children. The research informed pedagogy is driven by practitioner enquiry, supported by the specialist knowledge from Educational Psychologists (EPs), Occupational Therapists (OTs) and Speech and Language Therapists (S<s).

The practitioner informed approach, in which the support is co-designed by practitioners and specialists for practitioners, has acted as the catalyst for the workstream's growth (**Figure 2.3**). Through working collaboratively, within and across local authorities and health boards, the Northern Alliance is enabling best practice to be shared at local and regional level.

Raising Attainment in Literacy, Language and Communication

2017/2018 – Interim Report: November 2017

Bespoke Support for Practitioners (August 2017 – November 2017)

To support the local needs of each local authority, the Lead Officer has worked with individual local authorities to provide bespoke support. The following details the bespoke support which has been provided between August 2017 and November 2017 across the Northern Alliance local authorities.

Aberdeen City Council

The Lead Officer has worked with staff within Aberdeen City Council between August 2017 and November 2017 to:

- in direct collaboration with the Aberdeen City Education Key Link, provide guidance and materials to support the provision of the 17 Year 1 parallel schools
- develop Emerging Literacy within and across the Early Level through delivering training to 50 practitioners within 22 Early Learning and Childcare (ELC) settings to support them in taking a developmental approach to Emerging Literacy through developmental pedagogical knowledge and practical strategies.

Aberdeenshire Council

The Lead Officer has worked with staff within Aberdeenshire Council between August 2017 and November 2017 to:

- in direct collaboration with the Aberdeen City Education Key Link, provide guidance and materials to support the provision of the 47 Year 1 and 13 Year 2 parallel schools.

Highland Council

Emerging Literacy is a development which has continued to grow in Highland between 2013 and 2017. The Lead Officer, who is also the Highland Education Key Link, works as part of the Highland Emerging Literacy Strategy Group with representation from education, educational psychology, occupational therapy and speech and language therapy to:

- support the Authority-wide rollout of Emerging Literacy through practitioner training
- support the 62 Year 1 and 37 Year 2 parallel schools through the ten local Emerging Literacy networks
- deliver 'Taking a developmental approach to Emerging Literacy' training to the 84 Primary Probationers as part of the Literacy and English Career Long Professional Learning module.

Shetland Islands Council

The Lead Officer has worked with staff within Shetland Islands Council between August 2017 and November 2017 to:

- support the delivery of 'Words Up' training for Early Years Practitioners across Shetland. The collaboration between Speech and Language Therapists (S<s) in Highland and Shetland, developed through the Northern Alliance Raising Attainment in Literacy, Language and Communication Partnership Group, brought about the collaboration between S<s across the localities. A S< from Highland modelled the training for S<s in Shetland and, following the session, provided consultation to enable Shetland S<s to support the development of Words Up at local level.

The Lead Officer has liaised with the Education Key Links across the Northern Alliance local authorities to plan for bespoke input during the 2017/2018 session. Further information will follow in the March 2018 and July 2018 reports.

Northern
Alliance

Northern Alliance

Raising Attainment in Literacy, Language and Communication 2017/2018 – Interim Report: November 2017

3. Emerging Literacy across the Northern Alliance – Impact/ Outcomes

Measuring and Reporting Impact/Outcomes

The following pre/post measurements will be used:

- Highland Literacy developmental continua screens and trackers
- practitioner evaluations.

Data to be collected and submitted to track and monitor learner progress by:	Following data submissions and evaluations there will be a published report to detail impact and outcomes. Reports will be published on or around the following dates:
❖ Friday 15 th September 2017	❖ Interim Report published: Friday 17 th November 2017
❖ Friday 26 th January 2018	❖ Interim Report published: Friday 2 nd March 2018
❖ Friday 25 th May 2017	❖ End of Year Report published: Friday 6 th July 2018

Data collection and analysis: Outcomes for Children and Young People

In September 2017, Primary 1 practitioners from each of the schools used the Phonological Awareness Screen and Continuum and the Pre-Handwriting Continuum to identify a baseline of their children's foundational skills in reading and writing. Data was submitted by Friday 15th September 2017.

This report also details the outcomes for children linked to deprivation. Scottish Index of Multiple Deprivation (SIMD) information has been submitted by schools (where available). The ten deciles have been categorised as: SIMD 1-3: most deprived, SIMD 4-7: middle and SIMD 8-10: least deprived.

The breakdown of responses from September 2017:

Submission	Breakdown: September 2017	Breakdown by deprivation		
	September 2017	SIMD 1-3 (most dep)	SIMD 4-7 (middle)	SIMD 8-10 (least dep)
Phonological Awareness English	2,150	499	585	318
Phonological Awareness Gaelic	65	N/A	N/A	N/A
Pre-Handwriting: Fine Motor English and Gaelic combined	2,109	481	562	298
Pre-Handwriting: Scissor English and Gaelic combined	2,135	487	563	298
Pre-Handwriting: Pencil Control English and Gaelic combined	2,140	489	563	299

Northern
Alliance

Northern Alliance

Raising Attainment in Literacy, Language and Communication

2017/2018 – Interim Report: November 2017

The collated English Medium phonological awareness data (**Figure 3.1**) has indicated that:

- ❖ By the middle of September less than half of those Primary 1 children assessed had secure Word Boundaries (38%) and Syllable Detection (42%).
- ❖ By the middle of September over two in five children in Primary 1 (43%) did not have secure rhyme awareness and detection and over four in five children (85%) did not have secure rhyme production.
- ❖ In the assessment, with a score of a possible twelve, almost nine in ten children in Primary 1 (89%) scored less than nine.
- ❖ By the middle of September only 7% of Primary 1 children had fully secure phoneme discrimination, phoneme segmentation and phoneme blending, the phonemic awareness skills which underpin reading and spelling words using phonics.

The collated Gaelic Medium phonological awareness data (**Figure 3.2**) has indicated that:

- ❖ By the middle of September less than half of those Primary 1 children assessed had secure Word Boundaries (43%) and Syllable Detection (31%).
- ❖ By the middle of September over two in five children in Primary 1 (42%) did not have secure rhyme awareness and detection and over nine in ten children (90%) did not have secure rhyme production.
- ❖ In the assessment, with a score of a possible twelve, almost nine in ten children in Primary 1 (89%) scored less than nine.
- ❖ By the end of September only 3% of Primary 1 children had fully secure phoneme discrimination, phoneme segmentation and phoneme blending, the phonemic awareness skills which underpin reading and spelling words using phonics.

There is less research published around Gaelic Phonological Awareness than there is for English Phonological Awareness. It should be noted that rhyme is less prevalent in Gaelic than in English.

The Phonological Awareness Screen has the caveat by which, if a child does not score on two consecutive sections, the practitioner may use their professional judgement to discontinue the screen. Regardless of whether a practitioner continues or discontinues the assessment, through data analysis, the starting point of addressing gaps in phonological awareness would be the same – the individual pattern of gaps for each child.

It would not be expected, nor developmentally appropriate, for all children to be at the end of the phonological awareness skills continuum by the middle of September in Primary 1. The data has supported practitioners in identifying, planning for and addressing the gaps in phonological awareness as part of their literacy framework.

Phonological Awareness Skills by Deprivation (comparison): September 2017

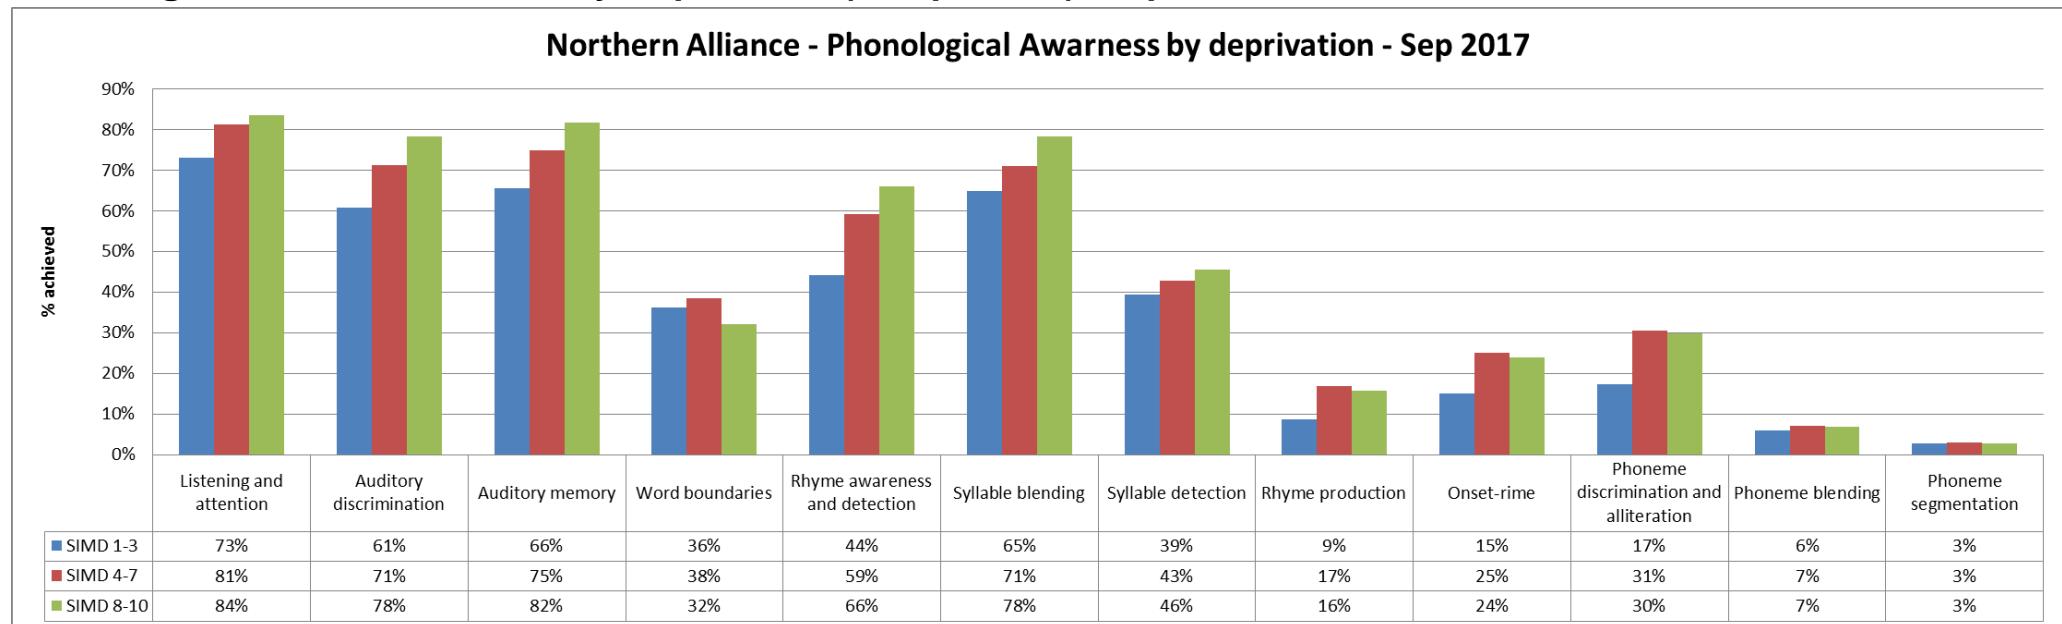

Figure 3.3 – Phonological Awareness Skills by Deprivation (comparison): September 2017

Phonological Awareness Skills by Deprivation (breakdown): September 2017

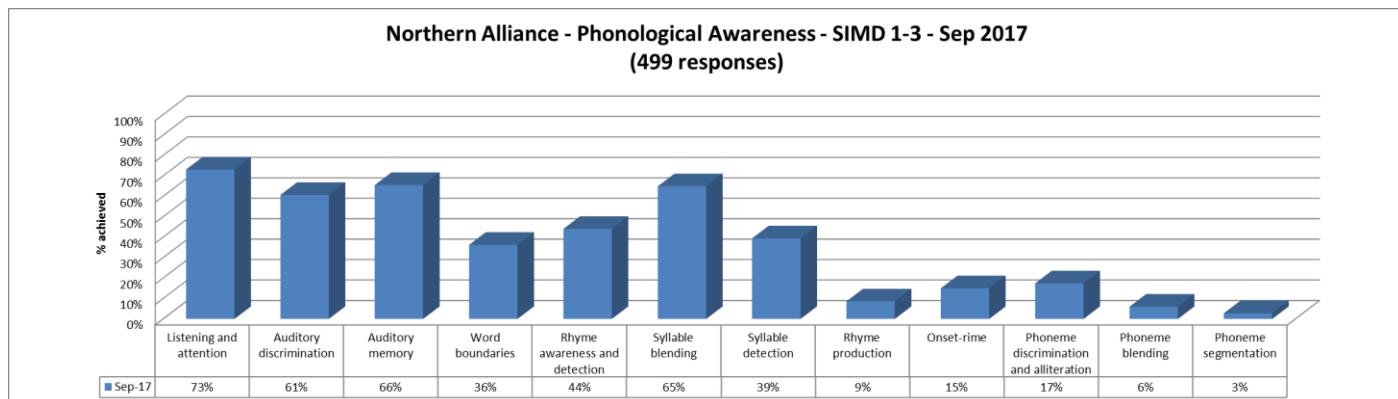

Figure 3.4 – Phonological Awareness Skills: SIMD 1-3 (Most Deprived)

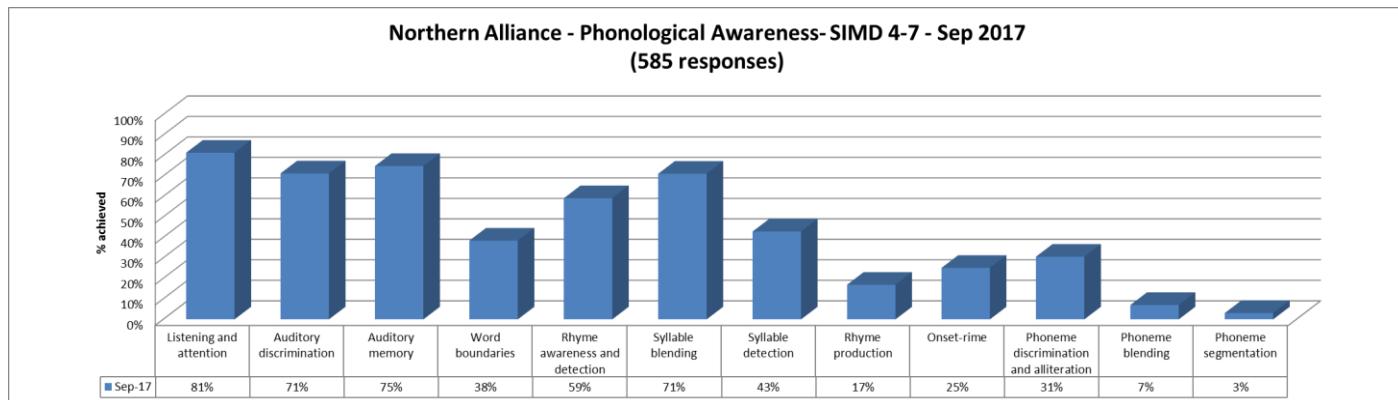

Figure 3.5 – Phonological Awareness Skills: SIMD 4-7(Middle)

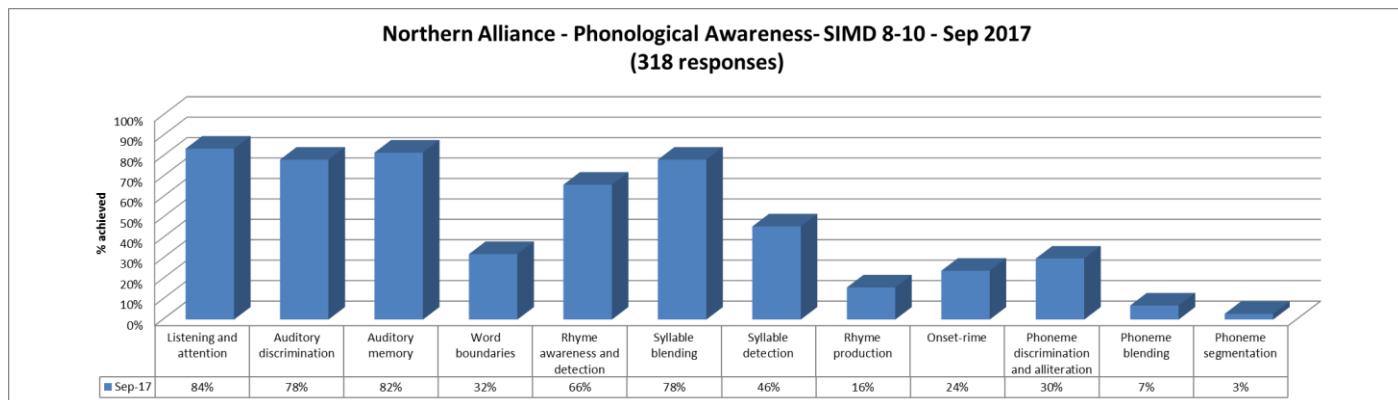

Figure 3.6 – Phonological Awareness Skills: SIMD 8-10 (Least Deprived)

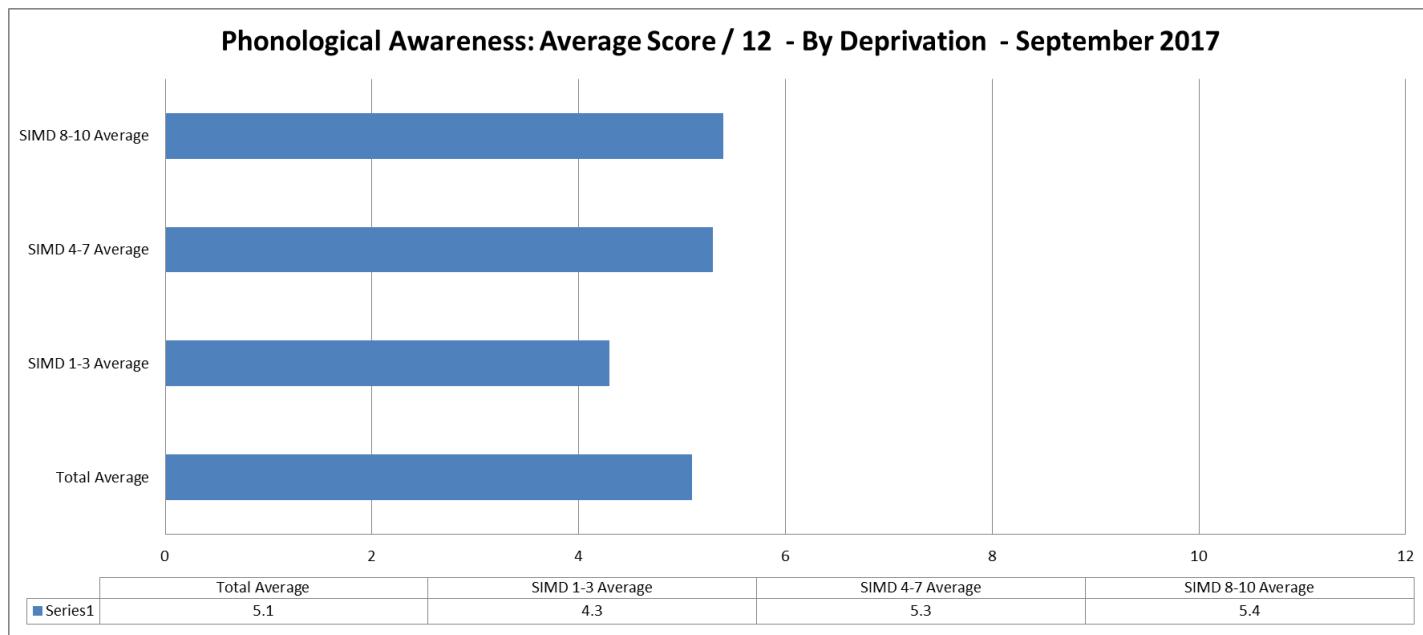

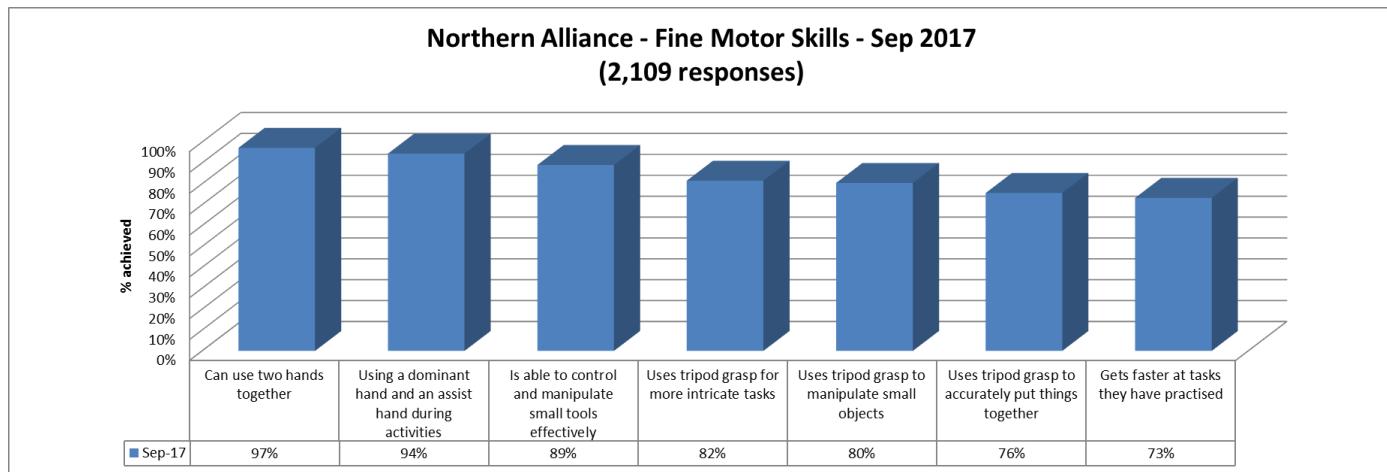

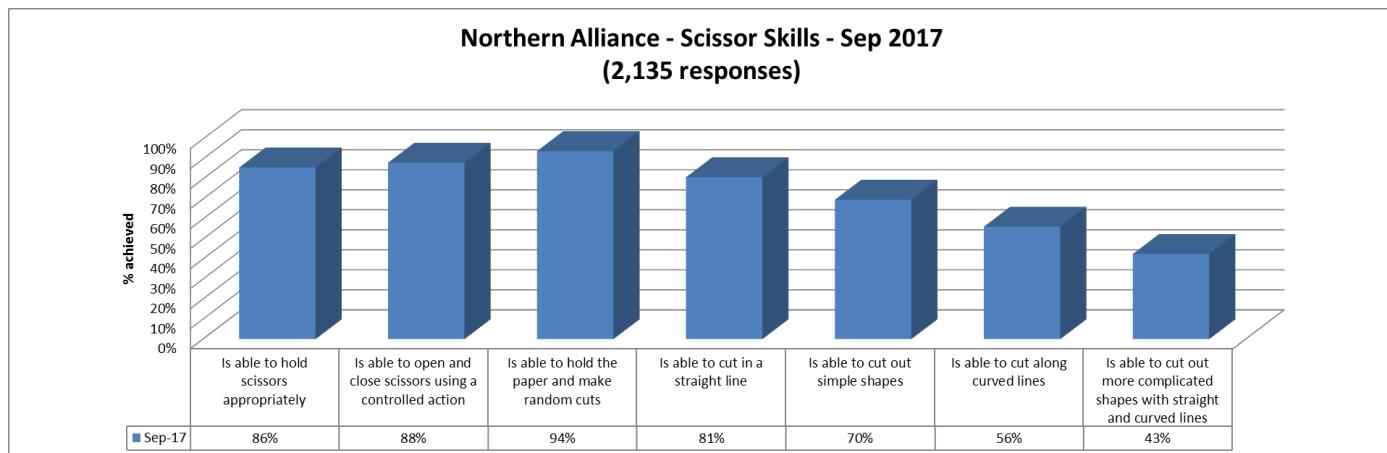

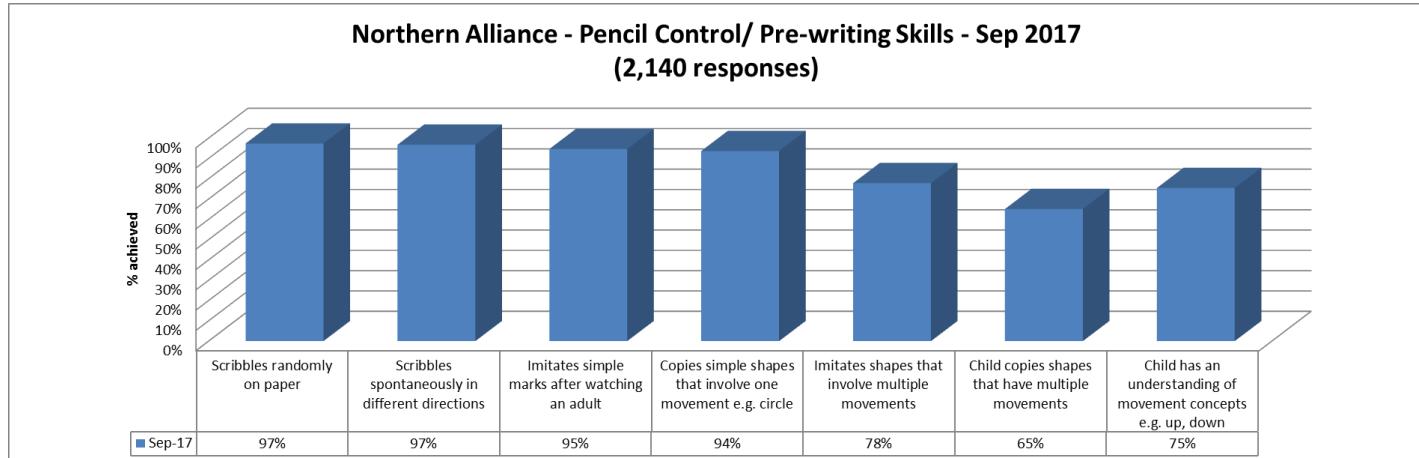

Figure 3.7 – Phonological Awareness Skills: Average Scores by Deprivation

The collated phonological awareness data, linked to deprivation, above (**Figure 3.3, Figure 3.4, Figure 3.5, Figure 3.6 and Figure 3.7**) has indicated that:

- ❖ In the foundational skills of auditory discrimination and auditory memory there is a gap on Primary 1 entry between those children from the most and least deprived areas. Both auditory discrimination and auditory memory are building blocks for many of the later phonological awareness skills.
 - Just over three in five children (61%) living in the most deprived areas (SIMD 1 – 3) had secure auditory discrimination skills, compared with that of almost four in five children (78%) living in the least deprived areas (SIMD 8-10).
 - Only two thirds of children (66%) living in the most deprived areas (SIMD 1 – 3) had secure auditory memory skills, compared with that of more than four in five children (82%) living in the least deprived areas (SIMD 8-10).
- ❖ In September 2017, children from the most deprived areas (SIMD 1-3) had an average score of 4.3 out of 12; the children from the middle (SIMD 4 – 7) had an average score of 5.3; and the children from the least deprived areas (SIMD 8-10) had an average score of 5.4 out of 12. On Primary 1 entry there is a gap of 1.1.

The data has supported practitioners to identify learners' strengths and gaps in their foundational reading and writing skills, providing targeted next steps, enabling practitioners to build solid foundations to raise attainment and close the poverty related gap.

Pre-Handwriting Skills – Overall: September 2017

Figure 3.8 – Fine Motor Skills: September 2017

Figure 3.9 – Scissor Skills: September 2017

Figure 3.10 – Pencil Control/ Pre-writing Skills: September 2017

The collation of pre-handwriting data (**Figure 3.8, Figure 3.9 and Figure 3.10**) has indicated that:

- ❖ By the middle of September more than one in four children in Primary 1 (28 %) scored five or less out of a possible seven in fine motor skills.
- ❖ By the middle of September almost half of the children children in Primary 1 (47%) did not have secure scissor skills, scoring five or less out of a possible seven.
- ❖ By the middle of September three in ten children in Primary 1 (30%) scored five or less out of a possible seven in pencil control/ pre-writing skills.
- ❖ By the middle of September almost one in five children in Primary 1 (19%) did not have a secure tripod grasp which is foundational to the manipulation of writing implements.
- ❖ By the middle of September over one in five children in Primary 1 (21%) did not demonstrate secure pencil control/ pre-writing skills which included *copying shapes which involved one movement, e.g. a circle*, and *copying shapes which involved multiple movements, e.g. an 'x'*, – these skills foundational to the formation of letters.

It would not be expected, nor developmentally appropriate, for all children to be at the end of the pre-handwriting skills continuum by the middle of September in Primary 1. The data has supported practitioners in identifying, planning for and addressing the gaps in pre-handwriting as part of their literacy framework.

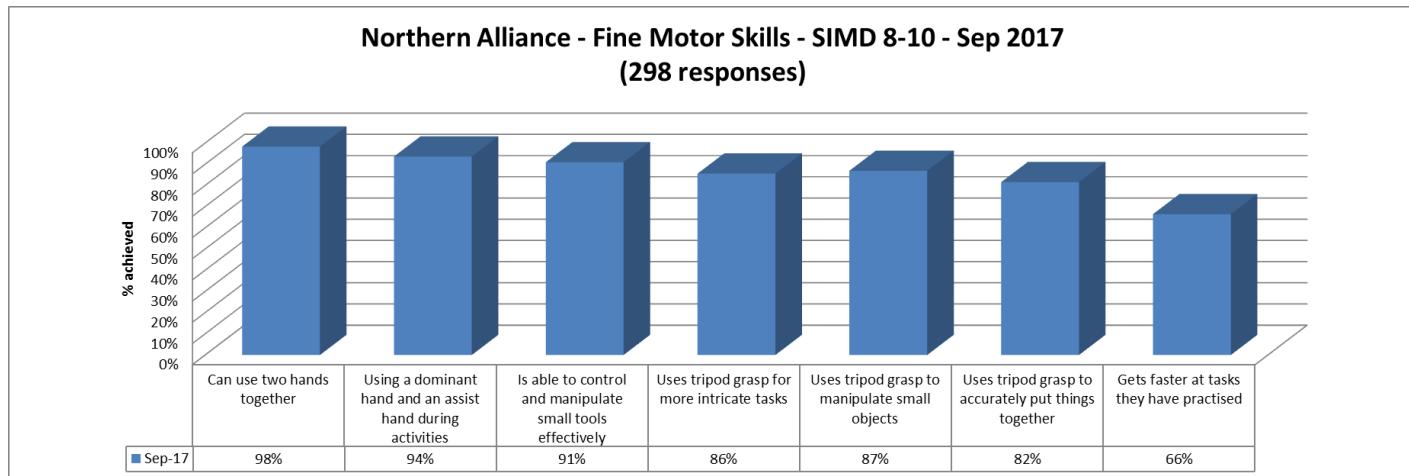

Figure 3.14 – Fine Motor Skills SIMD 8-10 (Least Deprived)

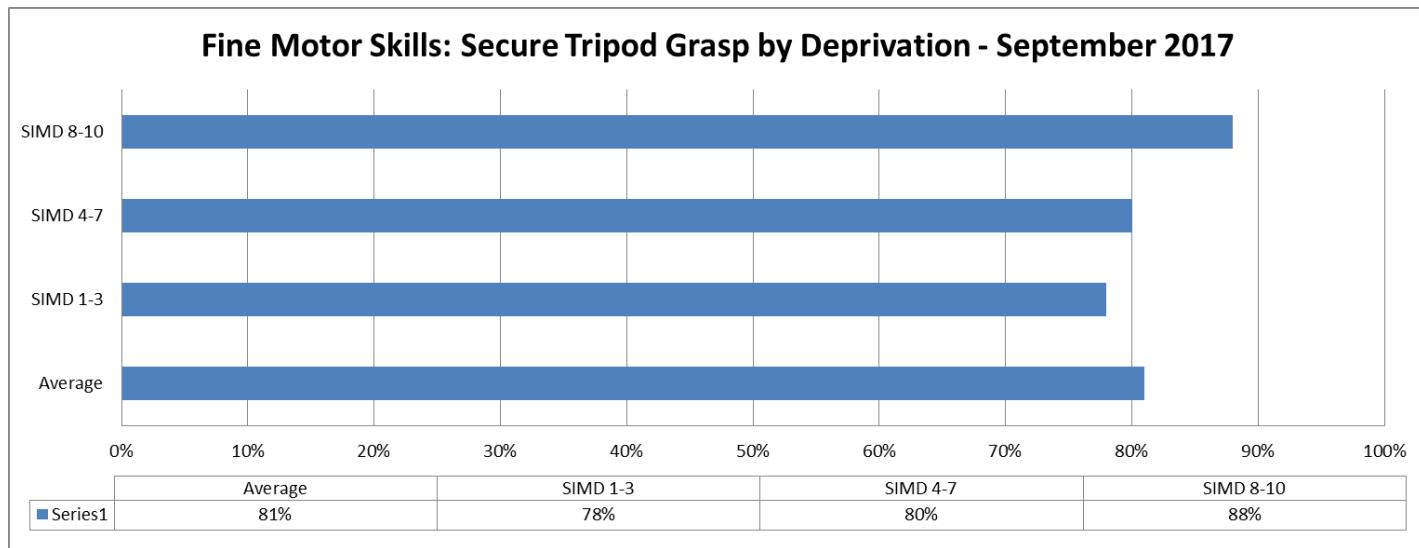

Figure 3.15 – Secure Tripod Grasp by deprivation: September 2017

The collated Pre-Handwriting (Fine Motor Skills) data, linked to deprivation, above (**Figure 3.11, Figure 3.12, Figure 3.13, Figure 3.14 and Figure 3.15**) has indicated that:

- ❖ In the foundational skill of having a well-developed tripod grasp there is a gap on Primary 1 entry between those children from the most and least deprived areas. Over two in ten children (22%) living in the most deprived areas (SIMD 1-3) did not have a secure tripod grasp. This compares with just over one in ten children (12%) living in the least deprived areas (SIMD 8-10) who did not have a secure tripod grasp.

Raising Attainment in Literacy, Language and Communication 2017/2018 – Interim Report: November 2017

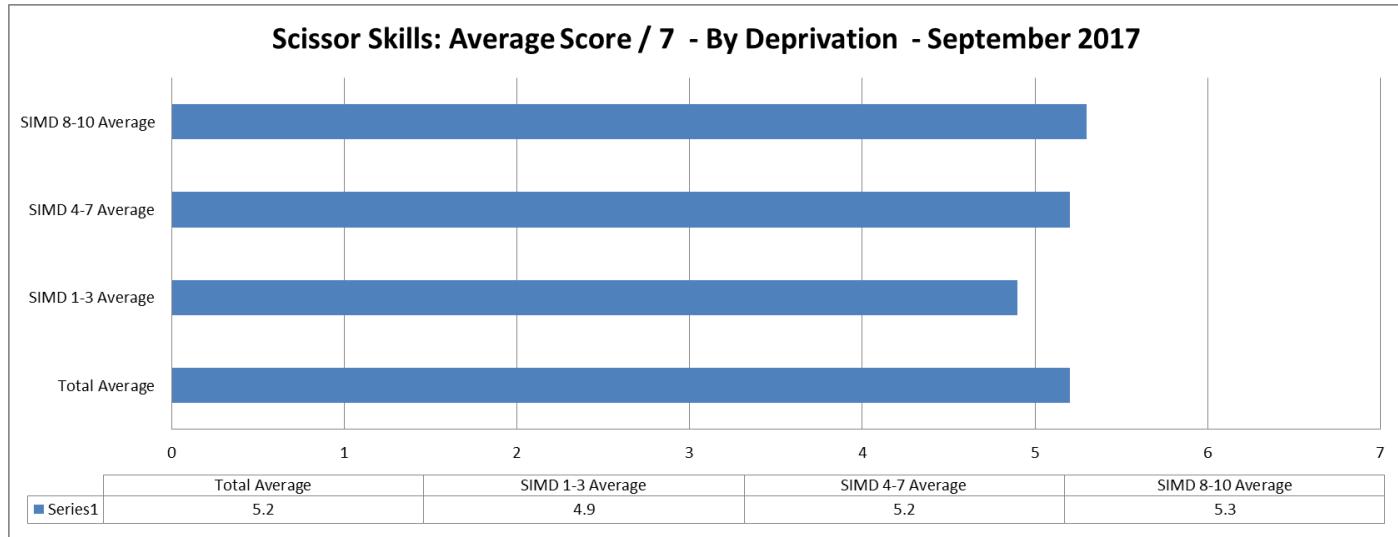

Figure 3.20 – Scissor Skills: Average Scores by Deprivation

The collated Pre-Handwriting (Scissor Skills) data, linked to deprivation, above (**Figure 3.16**, **Figure 3.17**, **Figure 3.17**, **Figure 3.19** and **Figure 3.20**) has indicated that:

- ❖ On Primary 1 entry those living in the most deprived areas (SIMD 1-3) had an average score of 4.9 out of a possible 7 on the scissor skills continuum. Those living in the least deprived areas (SIMD 8-10) had an average of 5.3 out of a possible 7.

2017/2018 – Interim Report: November 2017

Pre-Handwriting Skills by Deprivation:

Pencil Control/ Pre-writing Skills (comparison): September 2017

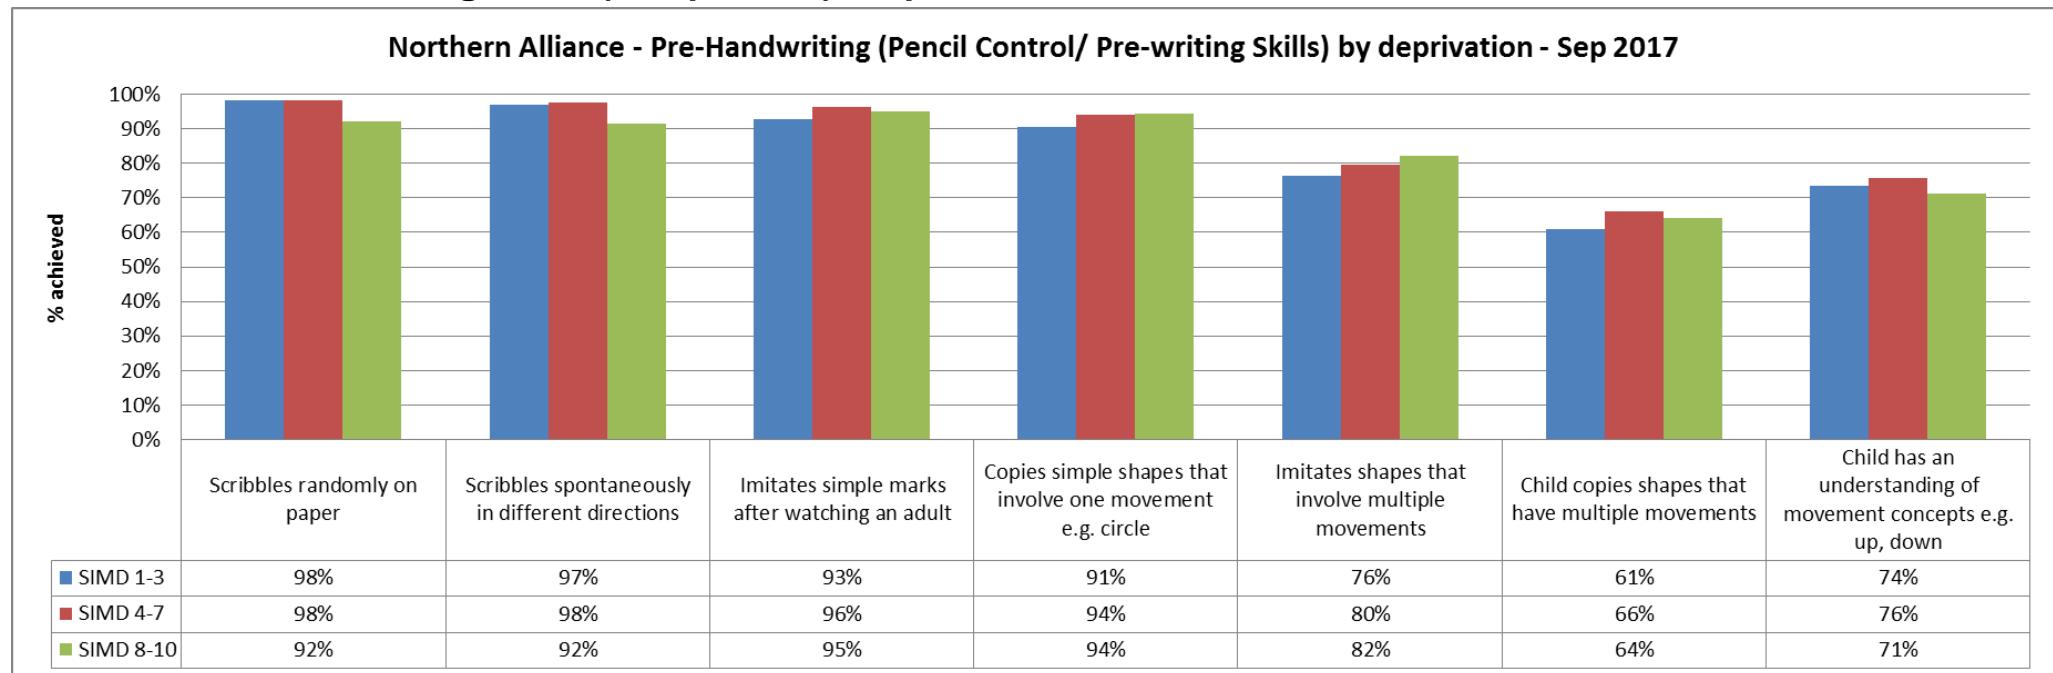

Figure 3.21 – Pencil Control/ Pre-writing Skills by Deprivation (comparison): September 2017

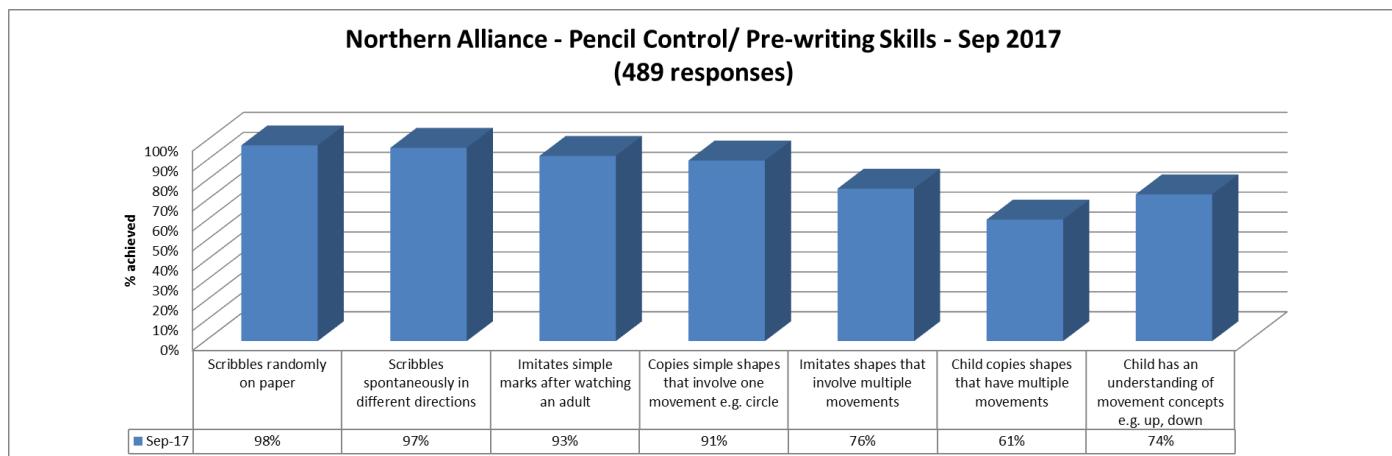

**Pre-Handwriting Skills by Deprivation:
 Pencil Control/ Pre-writing Skills (breakdown): September 2017**

Figure 3.22 – Pencil Control/ Pre-writing Skills SIMD 1-3 (Most Deprived)

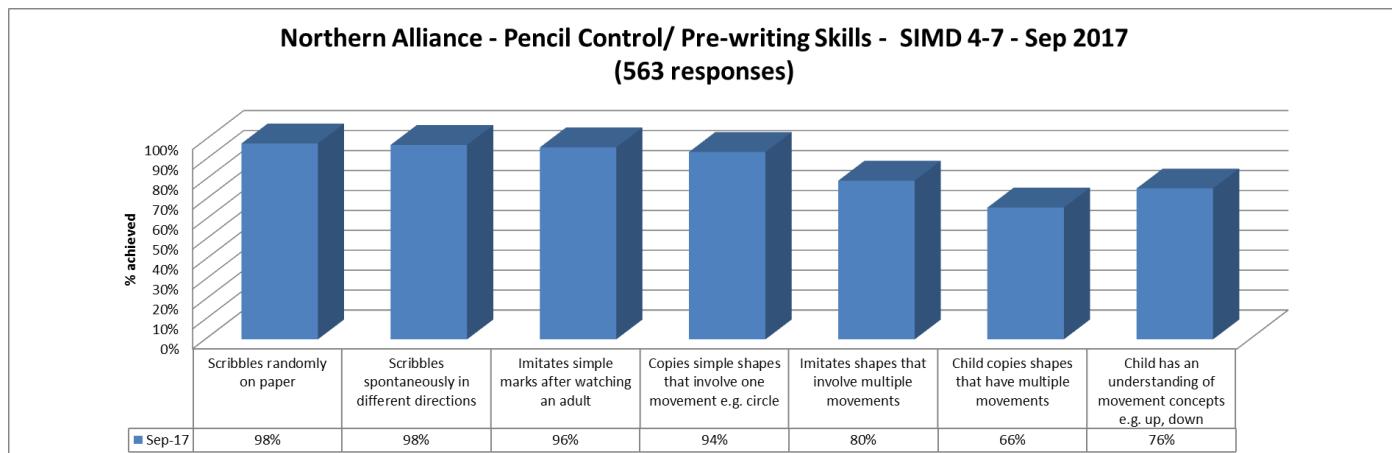

Figure 3.23 – Pencil Control/ Pre-writing Skills SIMD 4-7(Middle)

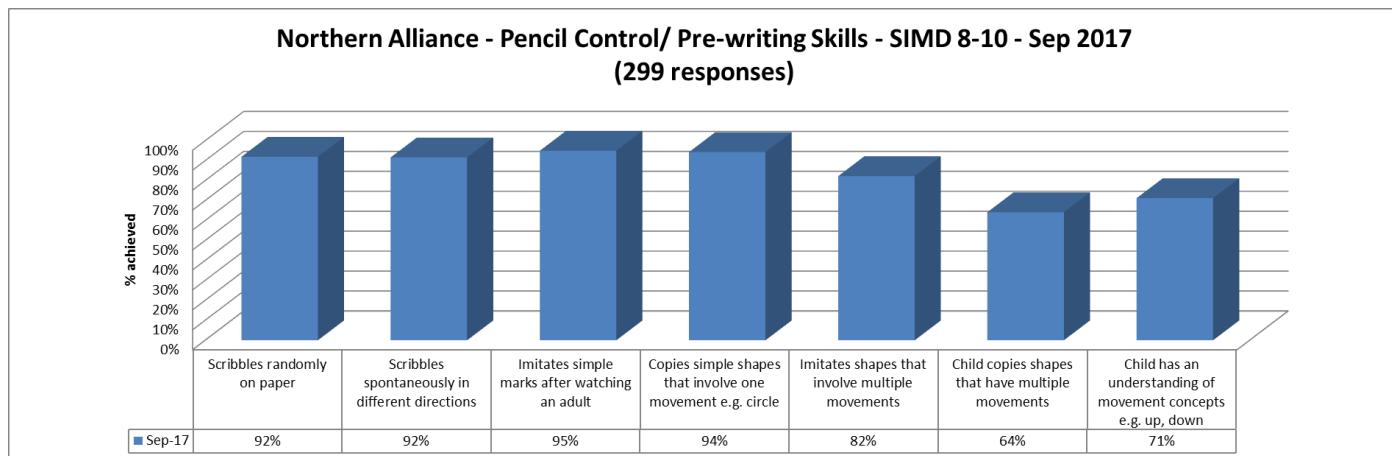

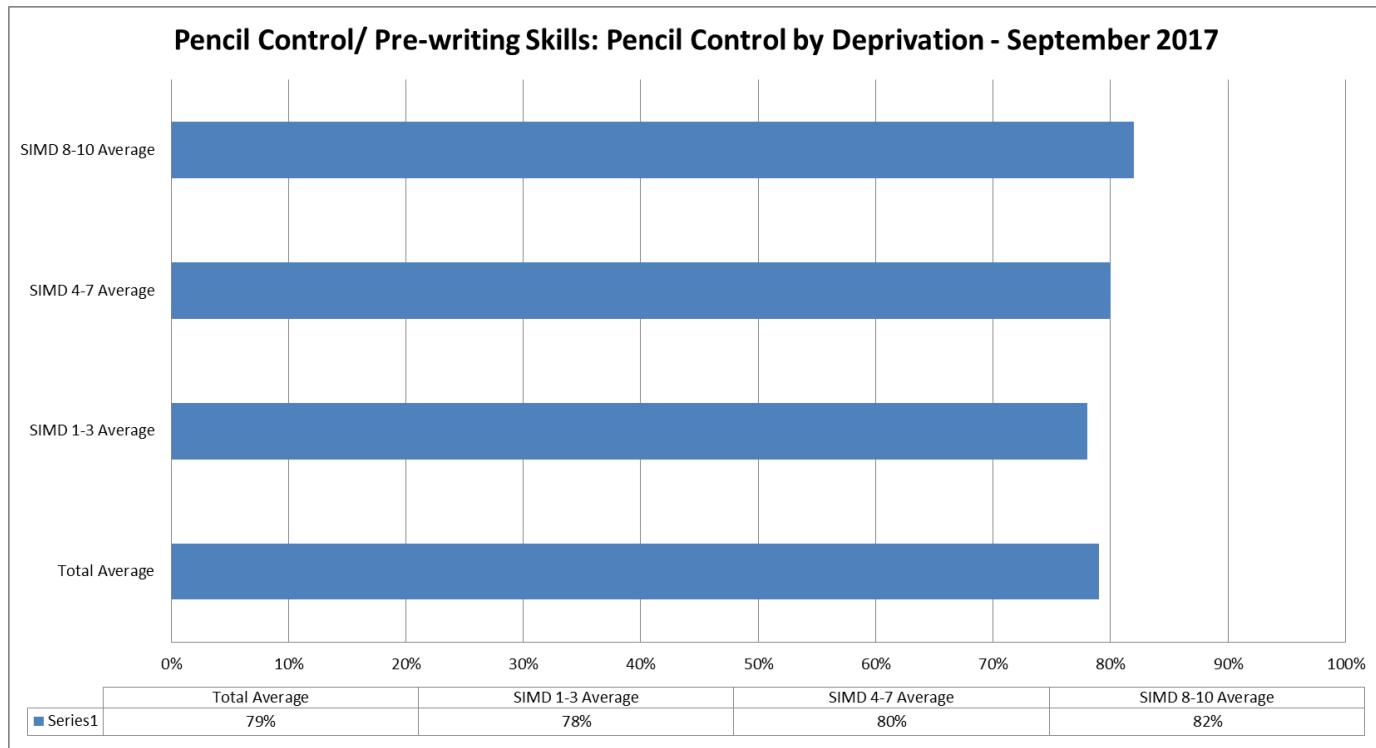

Figure 3.24 – Pencil Control/ Pre-writing Skills SIMD 8-10 (Least Deprived)

**Figure 3.25 – Pencil Control/ Pre-writing Skills: Pencil Control by Deprivation:
 September 2017**

The collated Pre-Handwriting (Pencil Control/ Pre-writing Skills) data, linked to deprivation, above (**Figure 3.21, Figure 3.22, Figure 3.23, Figure 3.24 and Figure 3.25**) has indicated that:

- ❖ The percentage of children who had secure pencil control/ pre-writing skills which included *copying shapes which involved one movement*, e.g. a circle, and *copying shapes which involved multiple movements*, e.g. an 'x', linked to deprivation was:
 - 78% of children living in the most deprived areas (SIMD 1-3)
 - 80% of children living in the middle (SIMD 4-7)
 - 82% of children living in the least deprived areas (SIMD 8-10).

Raising Attainment in Literacy, Language and Communication 2017/2018 – Interim Report: November 2017

Comparison between Phonological Awareness and Pre-Handwriting

At the data measurement point in September 2017 some of the learners who had gaps in phonological awareness had relatively few or no gaps in their pre-handwriting, and vice versa, some of the learners who had gaps in their pre-handwriting had relatively few or no gaps in phonological awareness. Some children had relatively low or no gaps in both phonological awareness and pre-handwriting.

It should be noted that some of these individual differences arise from natural variation in development as well as from environmental factors. Children vary in the rate at which they develop, and this can be different across domains. Thus gaps are not exclusively to be expected for children in relatively deprived areas nor assumed to be absent for those children in less deprived areas. For all children the appropriate intervention is to become aware of and cater for their foundational skills, both by providing environments that support the natural pace of development, and by adapting explicit literacy instruction to the presenting skill level.

Interim Report Summary – Future Recommendations:

1. As part of the national arrangements for regional collaboration the *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream should detail the action plan moving forward within the Northern Alliance Improvement Plan (due to be published in early 2018).
2. The successful model of collaboration developed within the *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream, and detailed within this report, should be shared with the Lead Officers of the Northern Alliance workstreams.
3. The data published within this report should be used as a basis to monitor ongoing progress and performance across the Northern Alliance. At school level practitioners should continue to use the data to inform learning, teaching and assessment to raise attainment and close the poverty related gap.
4. The *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream has been designed by practitioners for practitioners, with support from a wide range of Allied Health Professionals (AHPs) and other specialists. The collaboration within and between local authorities and health boards should continue to be developed to enable self-evaluation at practitioner level to inform the core support at regional level. AHP services may find it helpful to monitor the impact of participating in the workstream on service delivery against the ***Ready to Act*** framework.
5. The learning from the *Northern Alliance Raising Attainment in Literacy, Language and Communication* workstream should continue to be shared at national level to support ongoing improvement for Scotland's children and young people.

** Argyll and Bute joined the Northern Alliance in October 2017. Argyll and Bute have begun developing support for early literacy, language and communication as part of the Argyll and Bute Improvement Plan. As part of the Northern Alliance Improvement Plan, collaboration between the Regional Improvement Lead the Raising Attainment in Literacy, Language and Communication Lead Officer and key links within Argyll and Bute is currently being developed to enable practitioners across Argyll and Bute to benefit from taking a developmental approach to Emerging Literacy in collaboration with individual school and local authority improvement priorities.
